

24

glass panel moves along a predetermined orbital path with respect to the extrusion port of the molding die, thereby forming a panel unit having a predetermined external dimension.--

AFTER CALCULATION OF THE FILING FEE, PLEASE CANCEL CLAIM

1 WITHOUT PREJUDICE OR DISCLAIMER OF THE SUBJECT MATTER

THEREOF.

REMARKS

The specification and drawings have been amended to correct typographical errors and to clarify the disclosure. The subject matter which has been added is supported by the original drawings; no new matter has been added.

In addition, a new title and a new abstract, more descriptive of the subject matter of the invention, have been added.

Respectfully submitted,

Ira J. Schultz
